Summary

I'm a 16-year-old student from Czechia. Programming is my passion, and I am open to any job offers or internships. Currently, I am learning Java, and I have had a bit of experience with JavaScript and C#. Since December 2021, I have been actively learning programming. I have developed Android applications and websites since then.

At the moment, I have no professional experience with software development, but I would love to get some.
